

*Custom tube processing for  
any of your projects*

**CSM TRANSFORMING**

Summary

ABOUT	P.02
APPLICATIONS	P.04
TECHNOLOGY AND INNOVATION	P.05
SPECIALITIES	P.06
SERVICES	P.08
THE GROUP	P.10
CONTACTS	P.12

As part of the CSM Group, CSM TRANSFORMING specializes in tailoring, processing and transforming stainless steel tube welded by CSM TUBE into ready-to-use products.

CSM TRANSFORMING offers **on-demand processing with high precision and quality**. It is the latest division born in the CSM GROUP, with which it shares the strong innovative vocation and the engineering know-how through the partnership with CSM TUBE and CSM MACHINERY.

Using the latest technologies, CSM TRANSFORMING works with its customers to transform tubes into **customized solutions** that meet their specific needs. This **reduces manufacturing costs and times** and ensures **optimized tube processes**.

Punti di forza:

Optimization of the customer's production process

Custom processing

High precision and quality

Manufacturing **EXCELLENCE** dedicated to the “**TAILOR MADE**” **PROCESSING** of the **TRANSFORMED TUBE**.

CSM TRANSFORMING  
in numbers:

+60

countries  
we export to

H24

operation

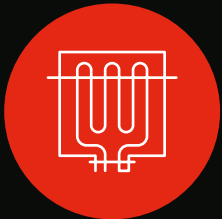

+22mil

annual  
production capacity

**WIDE RANGE** of applications  
for **ENDLESS PARTNERSHIPS.**

Those who rely on CSM TRANSFORMING are assured of **finding an answer to all their needs** with the highest quality and technological standards.

**Our products are used in many industries including:**

Heating elements

Heat exchangers

Food and beverage

Tubes cut to size

Energy

Automotive

**Advanced technology and continuous innovation for precision tube processing.**

The demand for **dedicated and customized solutions** that can **increase efficiency and shorten the supply chain** in stainless steel tube processing has led CSM TRANSFORMING to invest in **state-of-the-art machinery** and a **Quality Control Center** that performs continuous testing of stainless steel tubes.

This is possible thanks to the **manufacturing excellence** of CSM TUBE in the production of stainless steel tubes and the engineering know-how of CSM MACHINERY in the production of heating elements and stainless steel tubes. A winning synergy that guarantees customers a **reliable product that meets their specific requirements.**

# THE ONLY INTERFACE for “TURNKEY” SOLUTIONS

## Specific products for specific needs.

The ability to carry out a **wide range of processes** that meet the customer's specifications and can be **integrated into the customer's production** is the result of **established projects and in-depth knowledge** of the stainless steel tube supply chain.

For CSM TRANSFORMING, the **quality of the processing** achieved by the machines used is an indispensable condition of the service offered and a characteristic that makes the company a **solid and valuable partner**, committed to the constant improvement and expansion of the types of processing offered.

- Precision cutting
- Drilling
- Forming
- Bending
- Profiling
- Milling
- Curving
- Edge workings

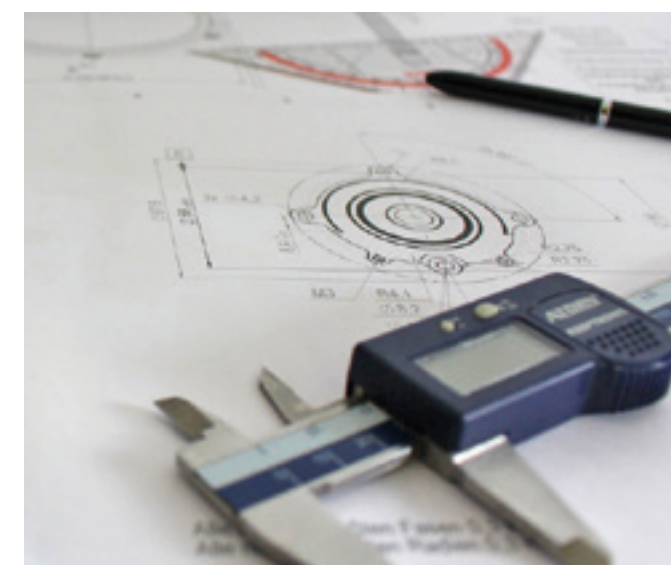

# A COMPLETE SERVICE, from **PERSONALIZED STUDY** to **FINAL REALIZATION**.

CSM TRANSFORMING supports the customer from the early stages of product design and analysis with additional services to understand the **feasibility of the required processing**, including **ad hoc solutions** where appropriate.

The goal is to **relieve the customer of unnecessary complexity and cost** and to ensure that the products are reliable for the specific applications.

One tube, a thousand possibilities.

## DESIGN

CSM TRANSFORMING develops **prototypes and renderings of the required processing** with the help of software that manages the work and optimizes the production of the components, in order to guarantee the **accuracy of the manufacturing and high quality standards**.

## CUSTOMIZATION

Each processing performed by CSM TRANSFORMING is designed and shaped according to the customer's needs and customized to become a **unique and indispensable component** of the finished product to be assembled.

The strength of a cohesive Group  
to create stainless bonds.

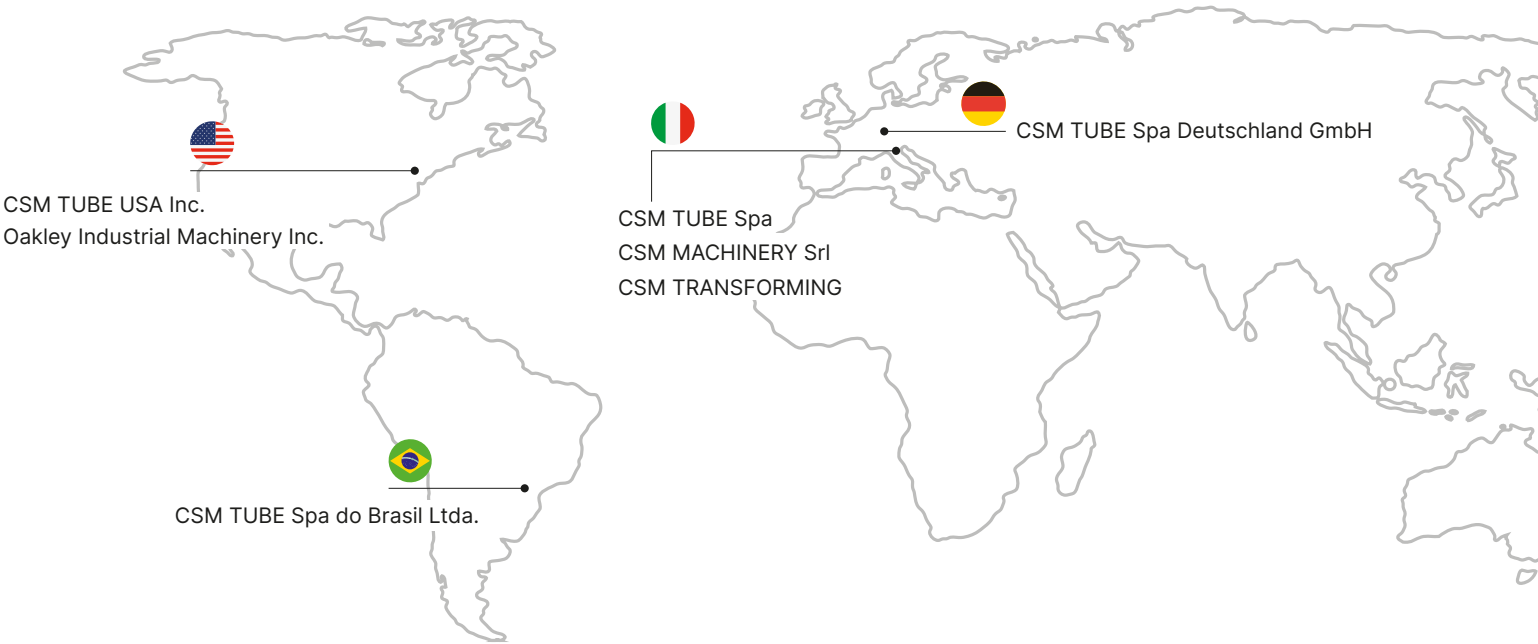

**CSM TRANSFORMING** is one of the 7 companies of **CSM GROUP**. The unbreakable bond between the company and the Group is characterized by the **synergy of engineering knowledge and personnel qualified** that ensure customized, state-of-the-art solutions. CSM GROUP was founded **over 40 years ago** with the ambition to bring

innovation and excellence to the construction of machinery and the production of stainless steel tubes. The seven companies that **belong to the Group** allow to best serve each market segment with readiness and in short period of time.

7 companies worldwide

40+ years of growth

200+ employees

**CSM TUBE**

Production of small diameter and thickness stainless steel tubes.

**CSM TRANSFORMING**

Custom tube processing for tailor-made solutions.

**CSM MACHINERY**

Machinery for the production of heating elements and stainless steel tubes.

**OAKLEY**

Manufacture of terminal pins and machinery for the production of heating elements.
